WORK HISTORY

BOLD Technology Systems Pvt Ltd - Module Lead

Noida, UP
04/2022 - Current

- Led the development of web applications using ReactJS and .NET Core, focusing on performance, scalability, and seamless integration of RESTful APIs.
- Led cross-functional teams to deliver technical solutions, streamlining processes and improving project timelines.
- Transitioned the project to React JS, utilizing analytics tools (Mixpanel, Segment, GA4), and email platforms (HubSpot, Pinpoint, and Iterable).
- Developed over 40 RESTful APIs, enhancing application capabilities, and ensuring seamless integration.
- Augmented application capabilities through the creation of over 40 RESTful APIs for effective integration.
- Diminished recurring system defects by 30% through the identification of over 50 system issues.
- Led cross-functional teams to deliver technical solutions, enhancing project timelines by streamlining processes.
- Maintained version control systems (Git) to ensure effective collaboration among developers and engineers during project lifecycles.
- Guided junior developers in coding practices and software development techniques., fostering skill growth and knowledge sharing within the team.

Siemens Technology And Services Private Ltd - Software Engineer

Bangalore
07/2018 - 04/2022

- Collaborated with cross-functional teams to gather requirements and develop high-quality software solutions.
- Configured and optimized core MES logic in Siemens Opcenter using MDUI editor, BP flow, and signals application to enhance system functionality.
- Created reusable UI components for Siemens Web Framework, providing essential building blocks for Siemens Opcenter Foundation.
- Achieved 35-40% faster response times by optimizing application performance and scalability.
- Increased test coverage by 70% using automated testing frameworks, reducing deployment issues.
- Reduced recurring system defects by 30% through diagnosing over 50 system issues.

PROFESSIONAL SUMMARY

Strategic Module Lead specializing in full-stack development, microservices, and cloud platforms. Delivered scalable applications while guiding teams to exceed project goals. Leveraged AI-assisted tools to enhance productivity and accelerate software delivery through automation. Focused on driving innovation and efficiency in software engineering with the integration of advanced technologies.

SKILLS

C#, .NET Core, RESTful APIs

React JS, Redux, Next JS, Node JS

HTML5, CSS3, JavaScript, ES6

GA, GTM, Segment, Mixpanel

Training and mentoring

Task delegation

Team leadership

EDUCATION

06/2018
VIT University
Vellore, India
Bachelor of Technology:
Information Technology
• GPA: 8.36

05/2013
RPM Public School

- Configured and optimized core MES logic in Siemens Opcenter through MDUI editor, BP flow, and signals application.
 - Developed responsive web applications using Angular to enhance user experience and performance.
-

PROJECT 1 : RESUME BUILDER

- **Architected Full-Stack Solutions:** Leveraged React JS, Redux, JavaScript, C#.NET, and Microservices Architecture to build and optimize high-traffic resume platforms (ResumeGenius, MyPerfectResume, Zety).
 - **Enhanced Platform Engagement:** Engineered high-quality resume templates, cover letter builders, and "Public Resume Sites" that enabled seamless social media sharing and increased user reach.
 - **Optimized Feature Delivery:** Successfully implemented job-matching algorithms and a "Resume Quality Score" system, directly improving job seeker success rates and application accuracy.
 - **Championed Agile Practices:** Managed source code and collaboration across diverse version control systems (Git, Mercurial, SVN, TFS) within fast-paced Agile environments to ensure on-time product releases.
-

PROJECT 2: SIEMENS OPCENTER

- **Advanced MOM Frameworks:** Contributed directly to the Siemens Web Framework, providing the UI foundation utilized across the Siemens OPCenter ecosystem for manufacturing operations management.
- **Developed Core UI Components:** Designed and deployed critical system features, including the interactive Side Panel and highly functional Business/Process Workflow applications.
- **Empowered End-Users:** Built the **MDUI Editor** (Solution/Design Editor), enabling end-users to seamlessly design, customize, and deploy their own independent applications.
- **Streamlined Industrial Workflows:** Designed and engineered a robust **BPMN application** for the OPCENTER UAF product, driving automation and process clarity.
- **Integrated Industrial Systems:** Successfully integrated Manufacturing Execution Systems (MES) with broader industrial automation applications to maximize operational efficiency.
